

BENTUSI CARGO BARGE

Paper model created by DEIMOS

e-mail: mr_deimos@o2.pl

How to assemble:

You shouldn't find this model very challenging. To make it, just follow the part numbers. Part 2 goes between parts 1 and 3. Part 5 is the bottom side of engine section (part 4). Make sure you attach the bottom panel (part 7) after making entire hull. It will give you easy access to all flaps inside the model, so you can stick it together thoroughly. Attach parts 8L (left) and 8R (right) at gray spots at the sides of part 4. Align the flat side of part 9 to the red marking at part 3. Good luck, and enjoy!
